

HUMILIS

Made in Assisi

Print settings

If you're wondering how to **measure the wrist size and get the correct result**, you should know that it is important to make sure that the print settings are set to 'Print to actual size'. Please check in the printer settings that no fit or resizing options are selected.

This ring size guide must be printed on a **full-page A4 (21 x 29.7 cm)** sheet.

To check that the wrist sizer has been printed correctly, please take a ruler and measure the example below: its length must be **exactly 5 centimetres or exactly 2 inches**.

How to measure the bracelet size

To determine the most suitable bracelet size, please **measure the circumference of your wrist** accurately. To measure it, you can use the tool in this guide or a tape meter. Alternatively, you can opt for a piece of ribbon or string, wrap it around your wrist and then measure the length on a ruler.

Please note that, for a correct fit of our bracelets, it is important to always **add 1 cm to the measurement** result, as specified in the sizes chart below.

How to measure the bracelet with a wrist sizer?

1. Print out the page (see the 'Print settings' section) and cut out the wrist sizer below.
2. Cut along the dotted line to form a slot where you can insert the pointed end of the gauge.
3. Wrap the wrist with the gauge and tighten it until it is close-fitting and comfortable on the wrist.

The correct bracelet size can be read in the slot.
