Print settings

If you're wondering **how to measure the ring size and get the correct result**, you should know that it is important to make sure that the print settings are set to 'Print to actual size'. Please check in the printer settings that no fit or resizing options are selected.

This ring size guide must be printed on a **full-page A4 (21 x 29.7 cm)** sheet.

To check that the ring sizer has been printed correctly, please take a ruler and measure the example below: its length must be **exactly 5 centimetres or exactly 2 inches**.

With this done, you know how to measure the ring size at home without difficulty and mistakes.

0 cm   1   2   3   4   5

0 in   1   2

How to measure the ring size

The ideal solution to **measure the ring size at home** is to use a ring that you already own. However, if you do not have a ring to determine this measurement, we recommend **using our ring sizer**, a simple tool that you can cut out and use with ease.

How to measure the finger with a ring sizer?

1. Print out the page (see the 'Print settings' section) and cut out the ring sizer below.
2. Cut along the dotted line to form a slot where you can insert the pointed end of the gauge.
3. Wrap the finger with the gauge and position it at the widest point of the finger where the ring will be placed.
4. Tighten until the gauge is close-fitting and comfortable on the finger.

The correct ring size can be read in the slot.
